gov.uk/designprinciples

1. Start with needs*
2. Do less
3. Design with data
4. Do the hard work to make it simple
5. Iterate. Then iterate again.
6. Build for inclusion
7. Understand context
8. **Build digital services, not websites**
9. Be consistent, not uniform
10. Make things open: it makes things better

***user needs not ~~government~~ university needs**

Service

Network backbone services

IT Services manages the University-wide ethernet, which provides fast links between systems, in addition to maintaining the links to the national and international networks (JANET and the Internet). IT Services provides support for a Frodo distribution switch within departments and colleges.

Service information

Service level definition

73286

MS Exchange for Bodleian Libraries

An email and calendaring service for Bodleian Library staff, based on Exchange 2003. This service will be migrated to Nexus in 2013 and decommissioned.

Service information

itsupport@it.ox.ac.uk 80020

Mirror Service

The mirror service supports various IT operations by providing local copies ("mirrors") of selected software sites and other internet repositories. Local mirrors typically offer fast downloads, do not depend on the availability of networks beyond Oxford, and reduce the load placed on our JANET connection and the source sites.

Service information

Service level definition

73200 Contact form

Message submission (smtp.ox.ac.uk)

The University's message submission service is provided by a set of servers known collectively as smtp.ox.ac.uk . This system provides authenticated submission available globally to users with valid Single Sign-On credentials, and anonymous submission available to Oxford IP addresses only.
