

Hilary Term ICTF SSP Update

David White and Nigel Brown
with Mark Dyson

Student Systems Programme

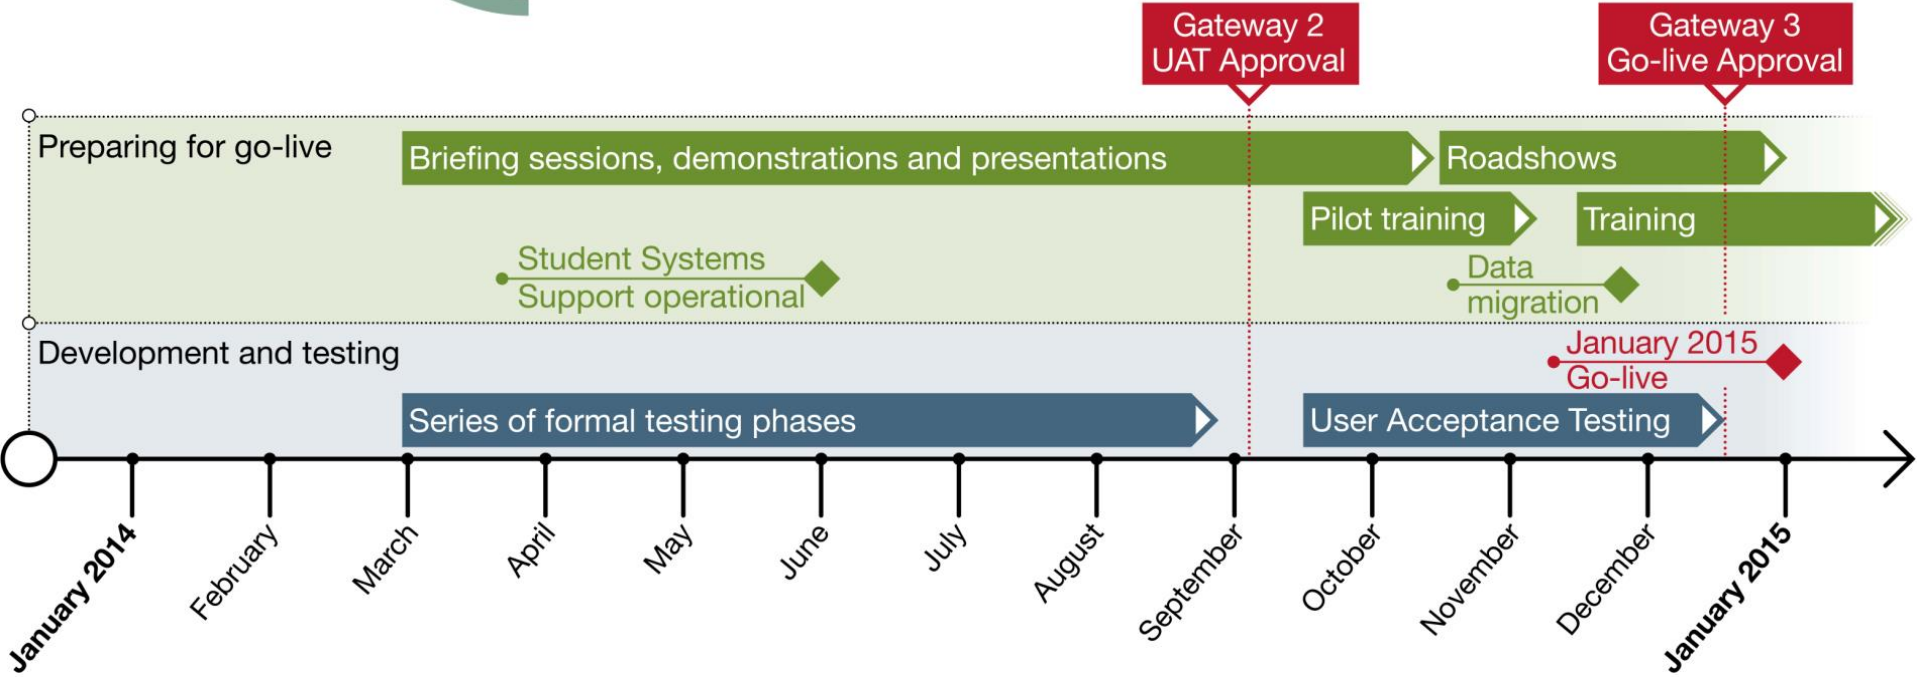

SSP Update

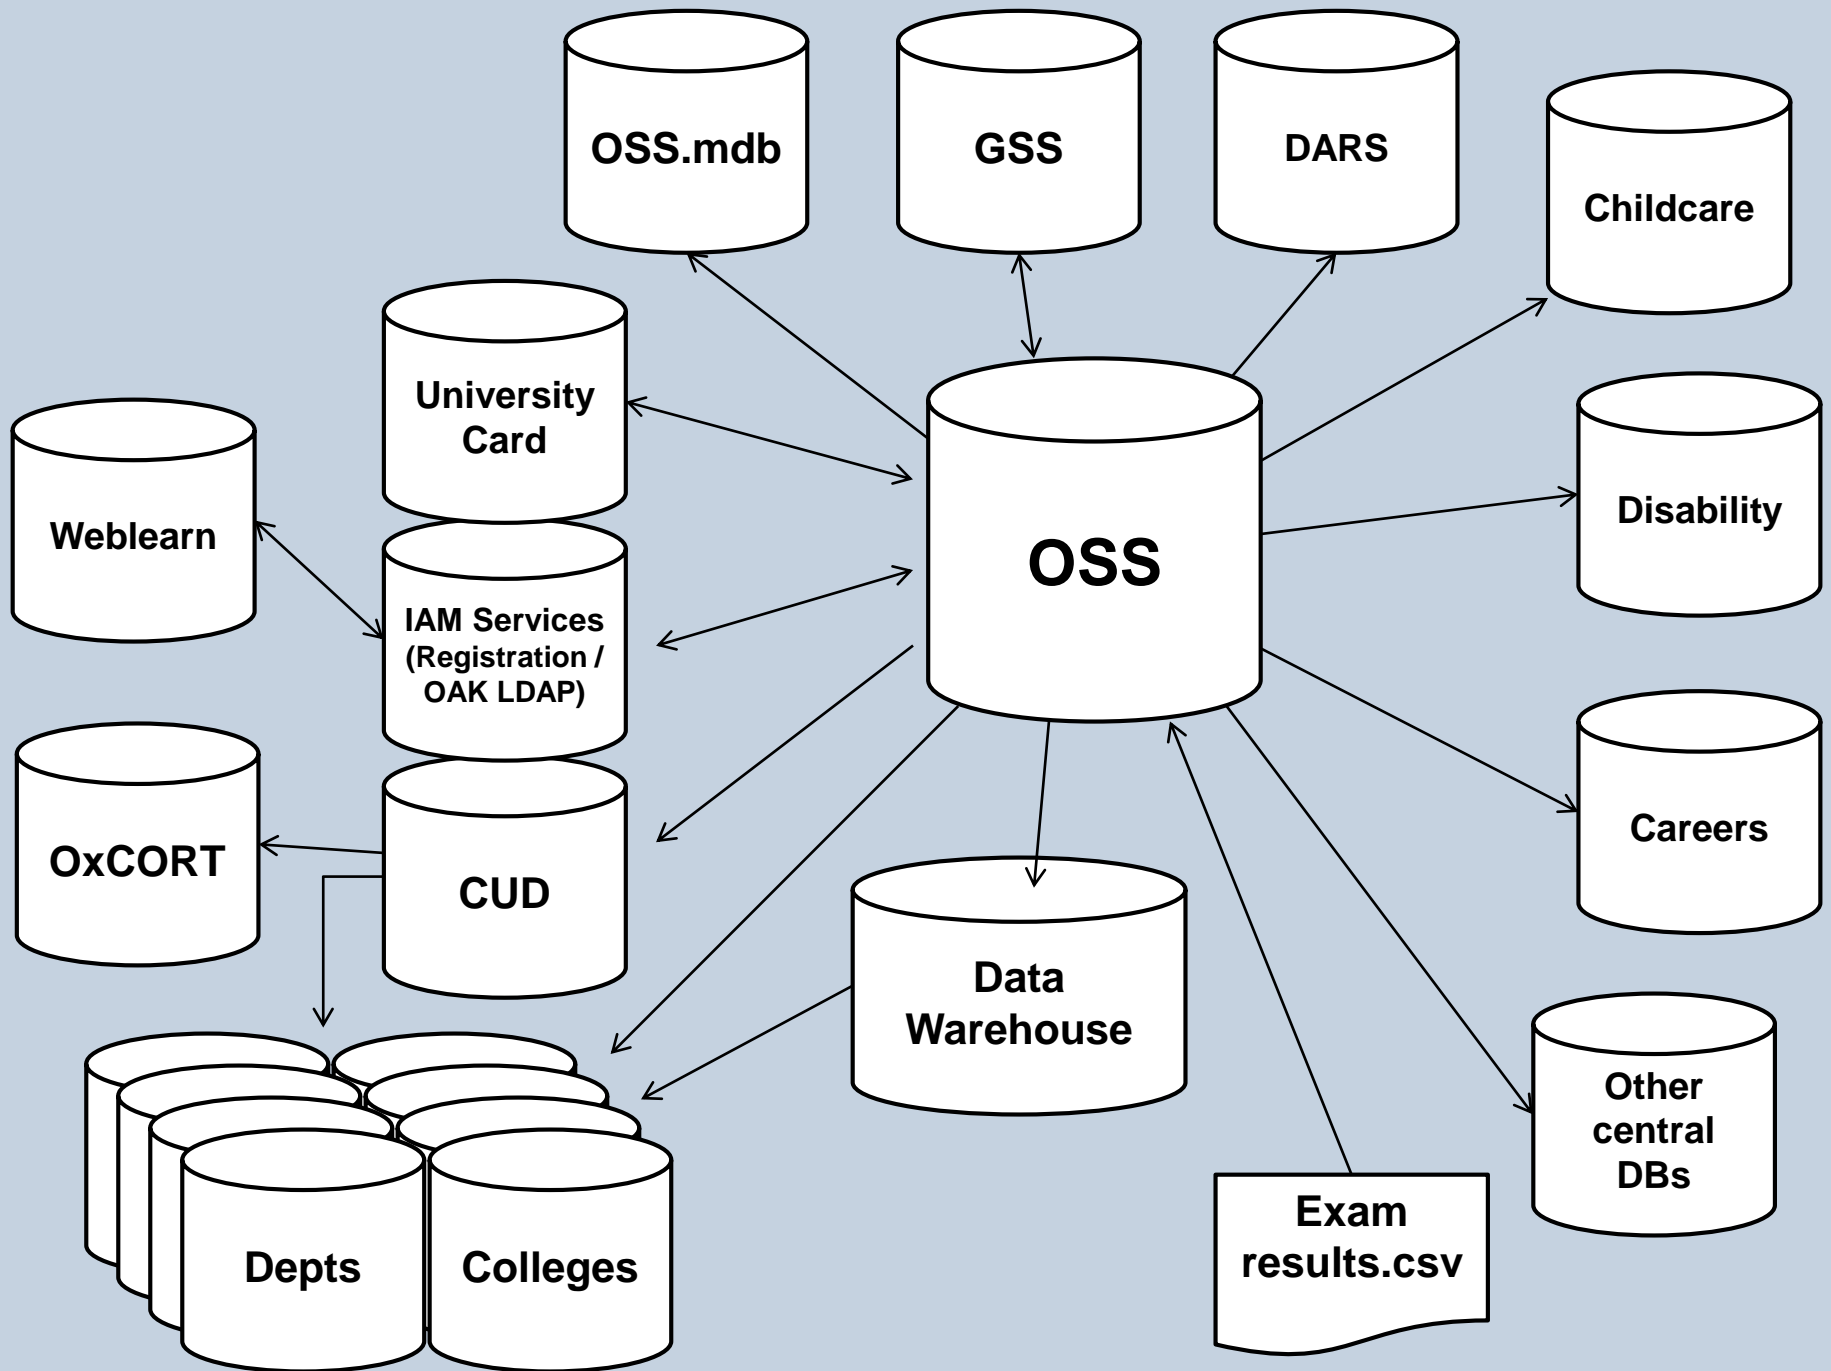

- Programme plan
- Data integration approach
- Student data feed

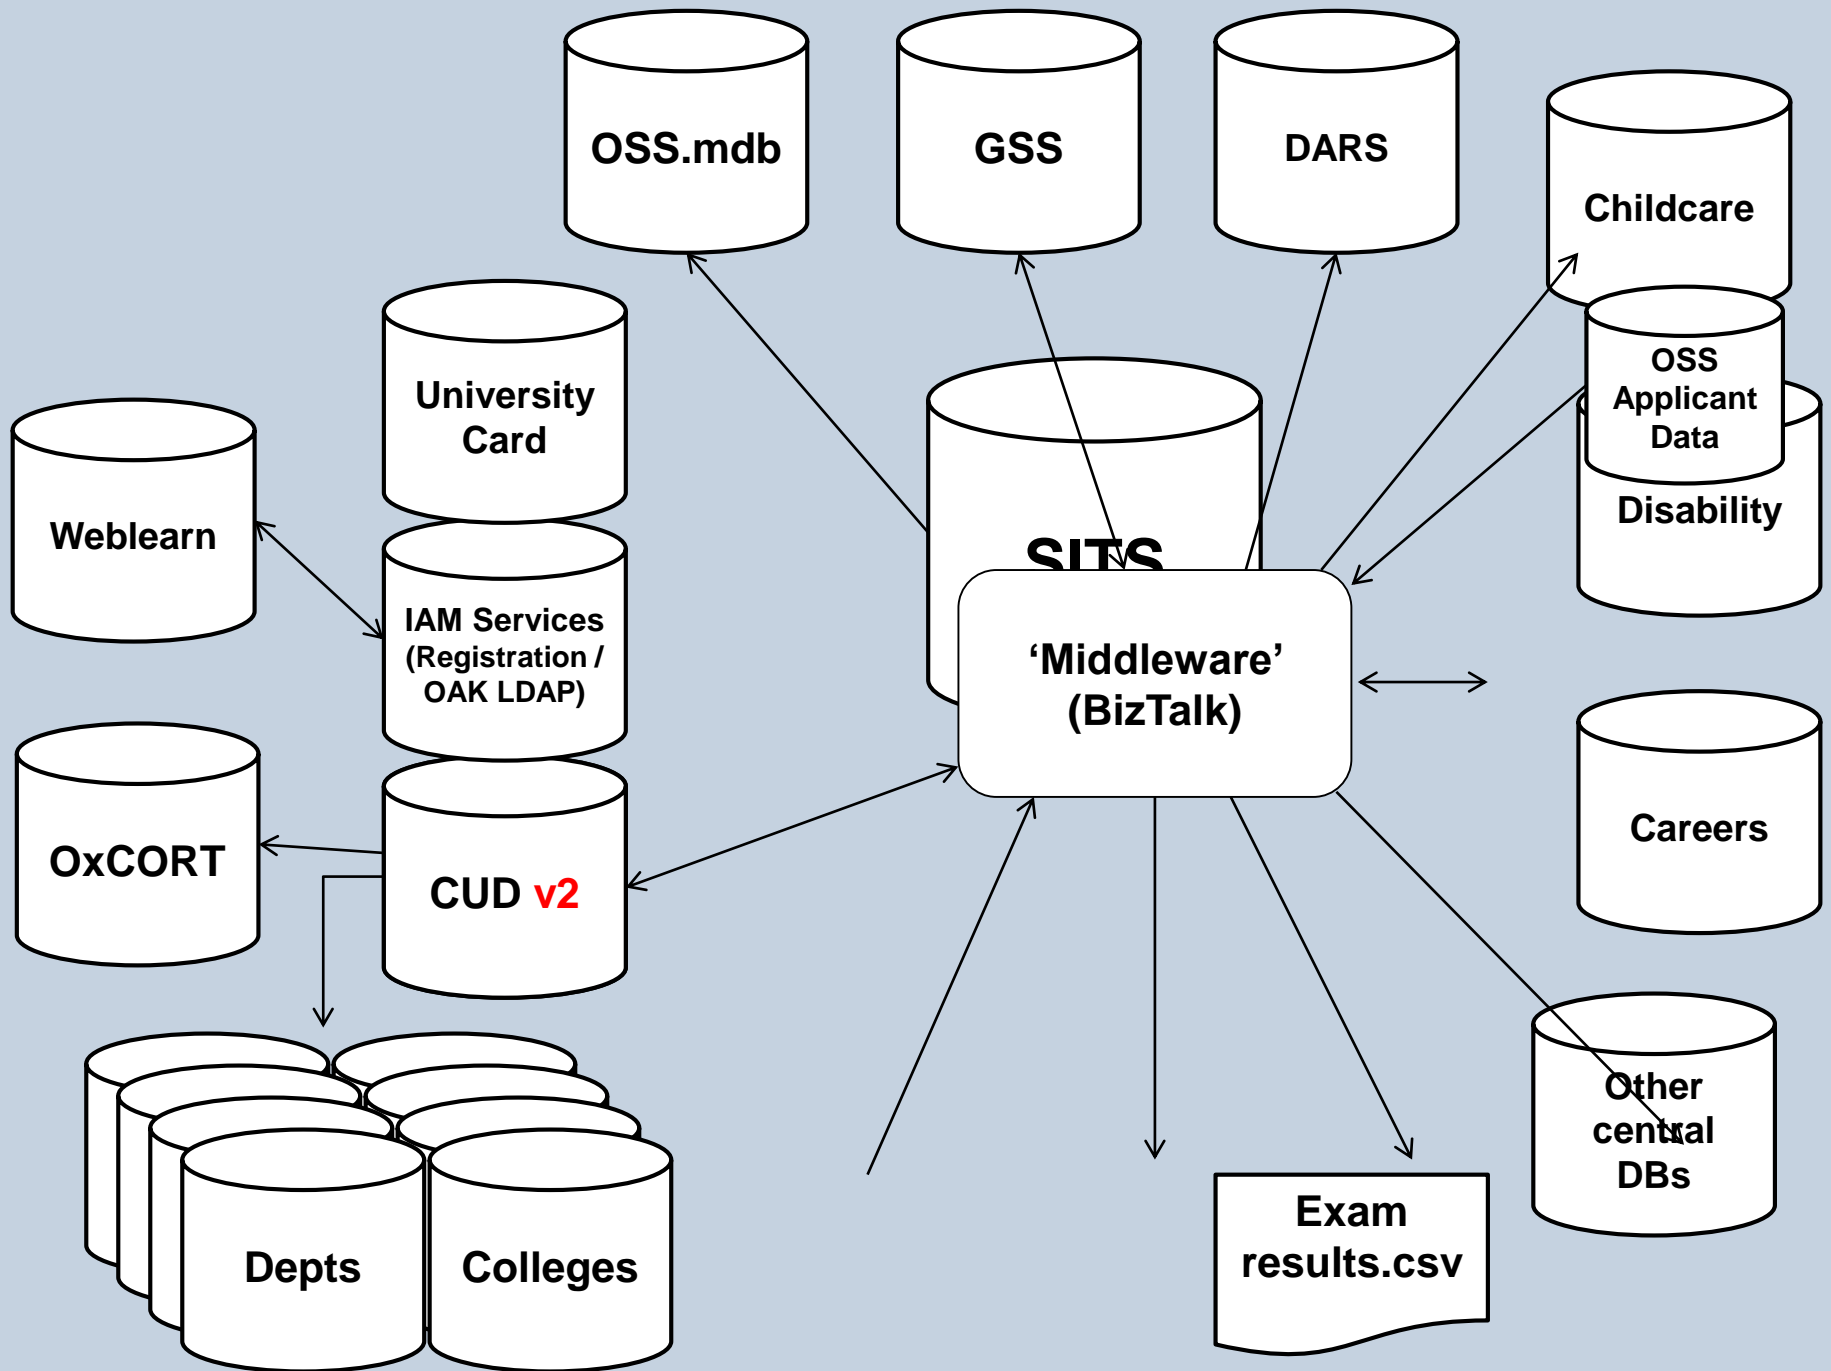

STUDENT SYSTEMS PROGRAMME

ON-COURSE STUDENT RECORD

Student data feed (a.k.a. CUD2)

- Data available
- Access methods
- The Plan

Data available

1. Applicants (from OSS) who have received an offer:
 - Undergraduates - from a college
 - Graduates - from a department
2. Students (from SITS)
 - On course (from contract to completion)
 - Completed in the last 6 months

Access based on CUD user's affiliation to college and department(s).

Data available

- Personal details (inc. contact details, IDs)
- Fee data
- Course details
- Exams and assessments
- Supervisor/college advisor

Access methods

REST web service offers optimal performance and future support.

LDAP (and all other existing CUD interfaces) available

If currently using OSS data warehouse:

- SQL push permitted where performance acceptable (colleges likely to be ok, large depts. subject to review)

Colleges signed up

Balliol

Corpus Christi

Exeter

Jesus
