

Student Systems Programme

17 December 2013

Denise Conway and David White

Student Systems Programme

- Replacing Oracle Student System (OSS) with SITS:Vision and eVision (web access)
- Supporting all major stages in student lifecycle, from pre-application to graduation
- Improving data-sharing with other key systems that support activities associated with Alumni and Development, Finance and Personnel

When?

- **November 2012:** eVision college degree ceremonies administration and student ceremony bookings live
- **October 2013:** New ADSS (Admissions Decision Support System) service live
- **Summer 2013:** Original planned go-live of Phase 1: eVision for management of main student record and admissions, with reporting and data interfaces (e.g. Student Data Feed)

When?

- Comprehensive review resulted in re-planning of timescales for Phase 1:
 - delivery of on-course student record in **summer 2014**
 - delivery of admissions for 2015-16 cycle
- **January 2014:** Gateway decision ('Gateway 1')

Risks & mitigation

- Underpinning data model within SITS:Vision
- Migration of data from OSS to SITS:Vision
- Devoting all available resource to mitigate this in time for Gateway 1
- Replacing existing functionality; not enhancing it: 'must haves' as opposed to 'nice to haves'

Summary 2014 activity

Pending Gateway 1 decision, January 2014:

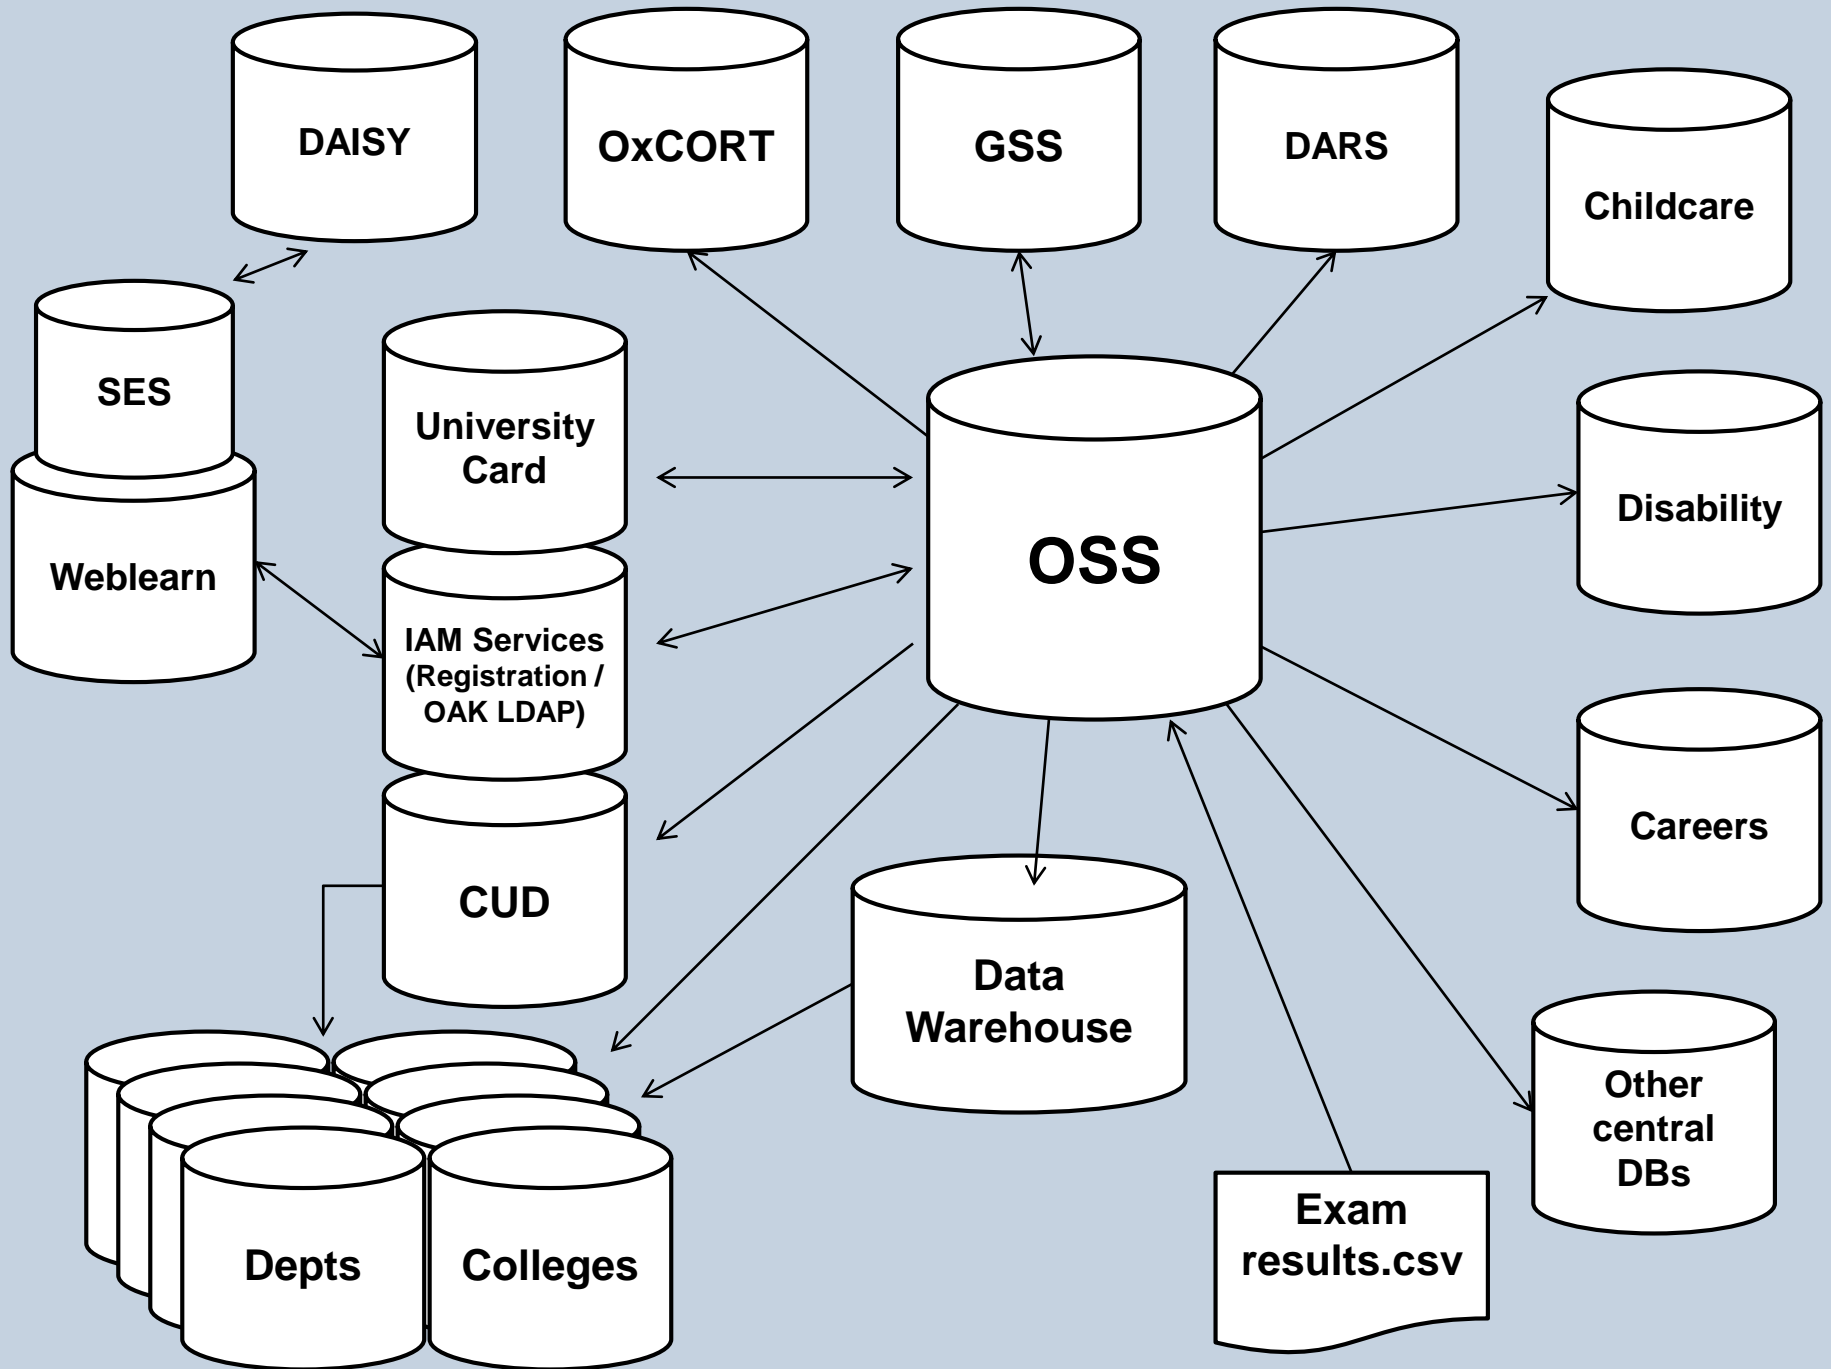

Date	Activity
February	Completion of on-course student record development
February - June	Full on-course student record system testing
June - July	User Acceptance Testing
July - October	eVision Training
from August	eVision student record roll-out
	Re-commence admissions development for delivery in 2015

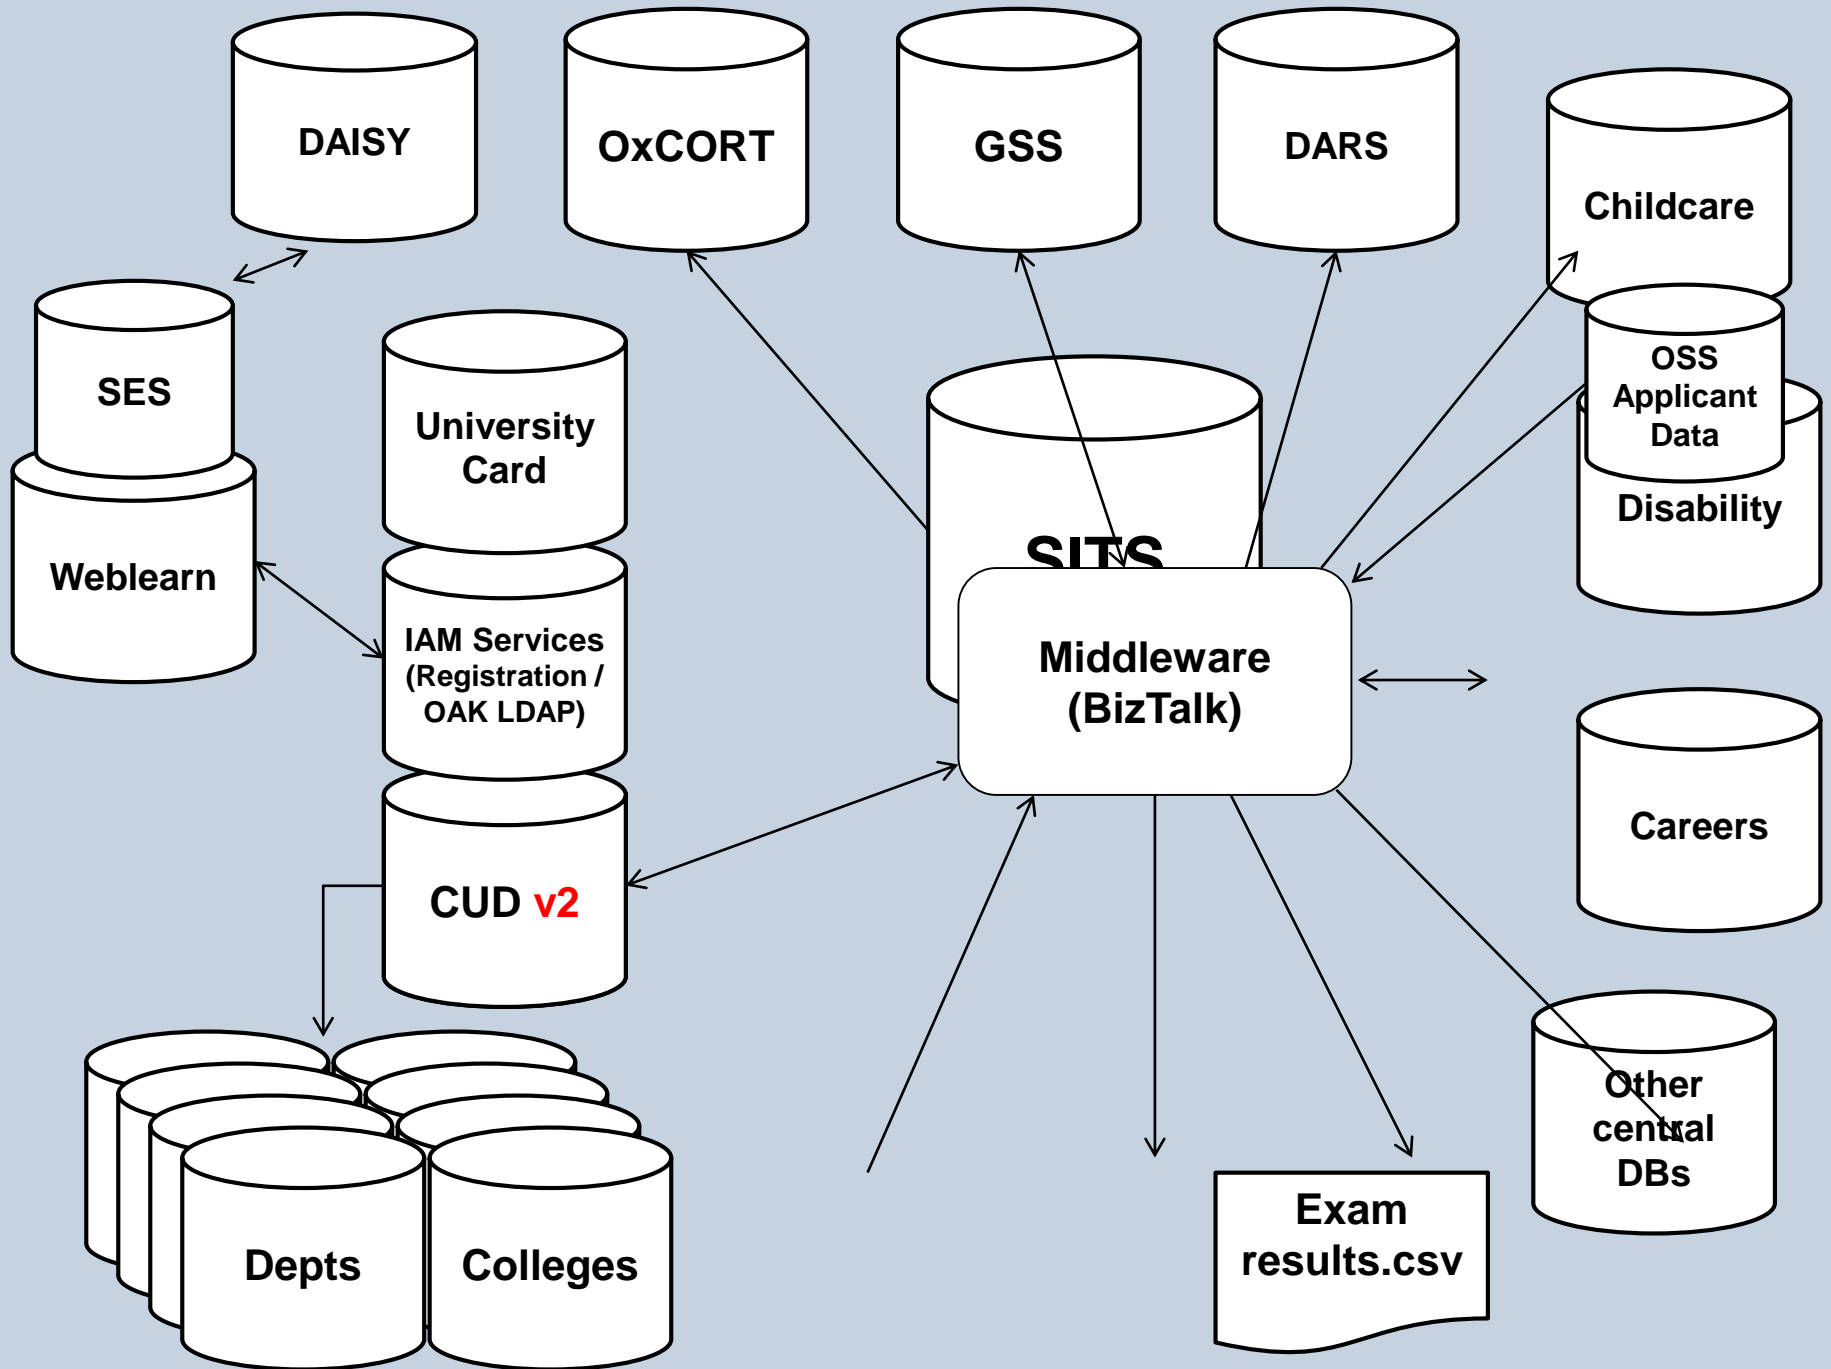

SITS data integration

Dedicated team assigned to:

- Build new interfaces between SITS and other systems
- Analyse and plan changes required
- Provide support to owners of 'target' systems

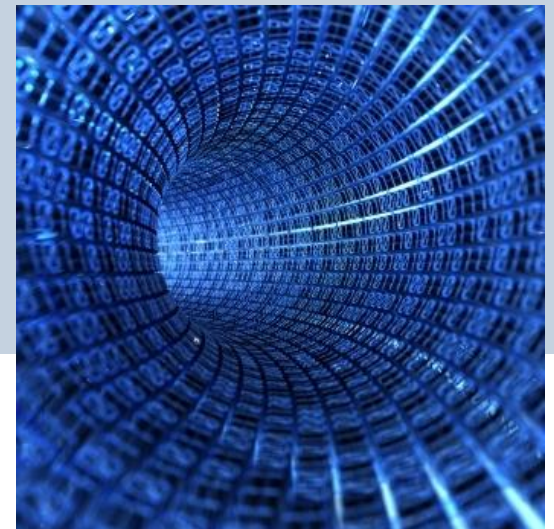

OSS Data Feed users

Existing OSS Data Feed and CUD users

- We'll be in touch soon. Briefings in January.
- You will be prioritised to ensure service continuity
- Mark Dyson (LMH and New) seconded to Programme

Not using OSS data feed?

- Expressions of interest welcome – briefings in the New Year
